

PREVENTING DOMESTIC VIOLENCE DURING THE COVID-19 PANDEMIC:

WHAT COMMUNITY MEMBERS CAN DO A VIRTUAL COMMUNITY DIALOG

Domestic violence is harming our community, state, nation and world resulting in physical and emotional trauma and even death. **1 in 4 women, 1 in 7 men** and significant numbers of people with other gender identities experience DV in their lifetimes. This destructive behavior has increased and intensified with the stresses and isolation of the COVID-19 pandemic. Come hear the knowledge and wisdom of experts in this field and discuss with fellow community members what we, as a community, can do to prevent this destructive relationship pattern. We invite community members, high school and college students, mental & medical health professionals, educators, and human services professionals to join this dialog.
